DETAILED ACTION
Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-11, drawn to an anti-idiotypic antibody that reacts with an anti-idiotypic antibody which represents an internal image of the antigen CA125.

Group 2, claim(s) 12, drawn to use of the antibody of group 1 for tumor treatment and/or prophylaxis.

The inventions listed as groups 1-2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking groups 1-2 appears to be that they all relate to the special technical feature of an anti-idiotypic antibody that reacts with an anti-idiotypic antibody which represents an internal image of the antigen CA125.

However, Schultes et al (Cancer Immunology Immunotherapy, 1998, 46:201-212) teaches an anti-idiotypic antibody that reacts with an anti-idiotypic antibody which represents an internal image of the antigen CA125.

Therefore, the technical feature linking the inventions of groups 1-2 does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

Accordingly, groups 1-2 are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept.
